Description

At Siemens Healthineers, we value diversity as the inclusion and collaboration of a variety of backgrounds, experiences, thinking, expertise, and individual qualities across all organizational levels. We encourage our employees to be themselves and empower them to unleash their true potential. This allows different ideas and approaches to thrive.

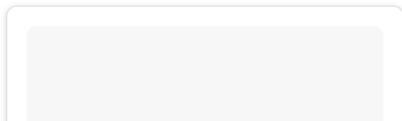

We believe that our differences make us stronger and enable us to be the innovative company we pride ourselves on. Innovation comes from change, and change takes time and persistence. That's why we are working on diversity, equity and inclusion every day.

To support you in expanding your awareness and learning on this important topic, we have curated a collection of publicly available DE&I resources that align with our DE&I goals and our diverse audience and regional requirements. We invite you to explore this diverse range of perspectives on DE&I.

DE&I language and terminology are continually evolving both globally and locally, and therefore some of the content in the resources we have included here may become outdated over time. We will regularly review and update the resources accordingly.

For additional resources and information, please visit the [Sustainability Sharepoint](#).
